Training Courses

Intensive Introduction to Google App Engine with Python

Presented by: Paul Barry
12th April 2012, London

This course is aimed at web developers looking to learn what Google App Engine brings to the web development table. In addition to exploring Python's Google App Engine API, course attendees will build, upload and deploy a complete working webapp to Google's cloud service during this one-day, hands-on session. Course attendees should note that prior knowledge of Python is useful, but not essential.

Presentation Skills

Presented by: Damian Conway
16th April, London

The best and most effective presentations capture the audience quickly, hold their interest effortlessly, educate and entertain them in equal measure, and sometimes even inspire them. This class explores simple and effective techniques for achieving those goals in any kind of presentation.

The first half of the class focuses on preparation, content selection, visual design, delivery, handling questions and effective techniques for presenting various kinds of technical information (code, data, statistics, charts, structure diagrams etc.)

The second half of the course is an in-depth tutorial on improving the 'look and feel' of presentation materials – especially Powerpoint/Keynote/Impress presentations. In particular, it demonstrates practical techniques for making your slides not suck!

Events

QCon	London, UK	7-9 March	☺
33rd Degree	Krakow, Poland	19-21 March	☺
