Training Courses

Regular Expressions Training Course - Damian Conway

Thursday 11th October 2012

Venue: Imperial Hotel, Russell Square, London WC1B 5BB

This full day course introduces beginner and intermediate programmers to the full functionality of Perl's regular expressions (and hence to the general behaviour of the Perl-compatible, or POSIX-ERE, regular expressions that are used in most other programming languages, editors, and developer tools as well). By the end of the day, you will no longer have to "cross your fingers" when using pattern matching, and will have gained the necessary understanding to start actively engineering regular expressions that are both correct and efficient.

Presentation Skills Training Course - Damian Conway

Friday 12th October 2012

Venue: Imperial Hotel, Russell Square, London WC1B 5BB

The best and most effective presentations capture the audience quickly, hold their interest effortlessly, educate and entertain them in equal measure, and sometimes even inspire them. This class explores simple and effective techniques for achieving those goals in any kind of presentation. See below the comments of a very happy attendee of a previous session:

"I attended Damian's 'Presentation Aikido' yesterday. It's the only time I've remained so engaged with a subject for 7-8 hours, and that includes school, university, OSCON and an all night session with Lord of the Rings. What's even more impressive is that I remained engaged with a subject I normally find incredibly tedious. Like almost everyone else, my professional life has been blighted by three dimensional transitions, psychedelic colour schemes and psychotic presenters, not all of my own creation. Damian's skill is to focus on the content and to cut the rubbish that can make presentations so unbearable. And that content is unparalleled. Using his hard-won experience as a speaker, he imbues attendees with a very real sense of what it takes to make great presentations, and that's the best possible outcome I could have hoped for."

- Graham Morrison, Linux Format

Who is Damian Conway?

Damian Conway is a renowned programmer, speaker and educator, best known for his work on Perl programming language. Previously as Associate Professor in Computer Science at Australia's largest University, for the past decade he has made his living entirely by giving conference keynotes, technical presentations, programming tutorials and professional training courses.

He has been keynote speaker at major technical Conferences such as OSCON, linux.conf.au, OLS, Webstock, DebConf, and GOTO, presenting on topics as diverse as quantum physics, website design, computational linguistics, bioinformatics, and programming language design.

He has also been invited to speak and teach at Institutions such as Harvard, MIT, Carnegie Mellon, U. Toronto and ETH Zurich and has delivered seminars and taught classes for major corporations including Apple, Yahoo!, Amazon, Canonical, Xerox, Qualcomm, Canon, Michelin, Morgan Stanley and Goldman Sachs.

A list of short books about fast developing technologies that are best purchased as e-books. You will receive the ebook in up to 5 DRM free formats and get the free lifetime updates when the content of the book is updated.
